STIK and Inventorum have their premises in Nacka Strand, in the building close to the water tower. Arriving by bus 443 from Slussen, the closest bus stop is 'Cylindervägen', with just a 400 meter walk to get to us.

(<http://stik.se>)

STIK - The Stockholm association of innovators is the largest association of inventors in Sweden, also the most rapidly growing society, with an average of 150 new members annually. STIK is a central part of the national Swedish inventors organisation SUF.

STIK's main incentive is strengthening the individual inventor and his/her role as the core source for national growth; technically, economically and socially.

STIK provides a variety of member services, covering all stages of the innovative process, between idea and commercial product.

STIK has a considerable acquired experience and knowledge in the innovative field, channeled into professional counseling to our inventor members.

STIK has well established relations with several foreign manufacturers, sales companies and entrepreneurs in countries such as China, Russia and Taiwan.

Through STIK, our members have the opportunity to present their inventions on the largest international innovation fairs.

STIKs subsidiary company Inventorum Service AB is probably the broadest consultant in Sweden, regarding services.

Services offered by Inventorum covers legal matters, technology topics, marketing, IPR and business economy.

Beside STIKs members, Inventorum naturally also serve external company clients, both domestic and international.

STIK/Inventorum is part of the international network of inventors, through representation on the board and executive committee of IFIA - The International Federation of Inventors Associations.

STIK provides free of charge:

- Counseling services
